

Spring Scene Super Sentences & Smart Answers

Requirements

Spring-themed video (2-3 minutes)

Worksheet with 'Wh-' question prompts (optional)

Pencil (optional)

Instructions

Introduction (5 minutes): Greet the patient and explain the activity. "Today, we're going to watch a short video about springtime! After we watch, we'll practice making sentences about what we saw and answering some questions." Explain that we will be working on making clear sentences and remembering details from the video. Briefly touch on the importance of good vocal quality for clear communication.

Video Viewing (2-3 minutes): Play the spring-themed video. Ensure the patient is paying attention. Let them know they'll need to remember the details.

Super Sentences (10 minutes): After the video, instruct the patient to formulate five complete sentences describing actions or objects they observed in the video. Encourage correct subject-verb agreement. Examples: "The birds are building a nest," "A bunny hopped across the grass," "The flowers are blooming in the garden." Provide verbal prompts as needed to elicit sentence formation. For example, ask, "What are the birds doing?" or "What colors did you see on the flowers?". Write down or have the patient write down the sentences they make for documentation.

Smart Answers (10 minutes): Using the optional worksheet with "Wh-" question prompts (or verbally asking the questions), ask the patient five "wh-" questions about the video. Examples: "Who did you see in the video?", "What was the bunny doing?", "Where did the birds build their nest?", "When did the flowers start to bloom?", "Why were the children playing outside?". Encourage the patient to answer in complete sentences. If the patient struggles, provide cues and prompts. For example, rephrase the question or offer a choice of answers. Note the patient's answers and any difficulties encountered.

Conclusion (2-3 minutes): Review the activity with the patient. Praise their efforts in sentence formation and comprehension. Give specific, positive feedback. For example, "Great job using complete sentences!" or "You remembered a lot of details from the video!" Address any difficulties observed and suggest strategies for improvement in future sessions.
