

Super 'S' Sounds Safari!

Requirements

Pictures of animals (lions, tigers, bears, horses, zebras, foxes, birds, cats, dogs)

Picture of a hissing snake (visual cue for /s/ sound)

Safari themed background or blanket

Toy binoculars

Small toy animals

Instructions

Set the Scene (5 minutes): Lay out the safari-themed background or blanket. Explain to the patient that today we are going on a "Super 'S' Sounds Safari" to find animals that make the /s/ sound. Show them the toy binoculars and explain they will be used to "spot" the animals.

Introduce the /s/ Sound (5 minutes): Show the picture of the hissing snake. Emphasize the /s/ sound and explain that it's like the sound a snake makes. Have the patient imitate the snake's hiss several times. Say, "We need to make our snake sounds to help us find the safari animals!"

Word Repetition – Singular /s/ (10 minutes):

Hold up one animal picture at a time (e.g., "horse," "fox," "cat," "dog").

First, say the animal name clearly.

Then, model the animal name with an /s/ at the end (e.g., "horse-s," "fox-s," "cat-s," "dog-s").

Remind the patient to make the snake sound. Point to the snake picture as a visual cue.

Have the patient repeat the word with the /s/ sound at the end. Provide positive reinforcement and encouragement. If they struggle, break the word down and emphasize the /s/ sound. Aim for at least 10 trials, varying the animals presented.

Word Repetition - Plural /es/ (5 minutes):

Take the toy animals. Hold up two or more of the same animal at a time.

First, Say the animal name clearly with the plural /es/ ending (e.g., horses, foxes, cats, dogs)

Remind the patient to make the snake sound. Point to the snake picture as a visual cue.

Have the patient repeat the word with the /es/ sound at the end. Provide positive reinforcement and encouragement. If they struggle, break the word down and emphasize the /es/ sound. Aim for at least 10 trials, varying the animals presented.

Cool Down (5 minutes): Review all the animals they found on their "Super 'S' Sounds Safari" and praise them for their hard work making their snake sounds. Give the patient a sticker or small reward for participating.
